Subject: OR CZARA tpts for OD Staff Meeting

AWPD continues to work closely with R10, OGC and NOAA to develop the federal register notice and supporting documents to propose the disapproval of OR's coastal nonpoint program, pursuant to a settlement agreement (SA) with Northwest Environmental Advocates. The agencies are aiming to issue the notice by December 13th (the Nov. 15th SA deadline is not achievable due to the shutdown). The agencies have communicated to the OR Governor's office the gist of the findings to be published for each of the four outstanding management measures.

After FR notice publication there will be a 90-day comment period. Final agency action will likely be sometime in June 2014 (SA deadline May 15th). A final decision to disapprove a state's coastal nonpoint program would be precedential and result in financial penalties to the state (EPA 319 funds and NOAA CZMA funds).
